PROJECTS

- **LIVE CHATBOT USING ML**
Developed an intelligent chatbot capable of simulating human-like conversations using Machine Learning and Natural Language Processing (NLP). The chatbot processes user queries in natural language and provides relevant, real-time responses through a text-based interface. It was designed to enhance user interaction in applications such as websites, mobile apps, and messaging platforms.
- **GESTURE CONTROLLED VIRTUAL MOUSE**
Developed a machine learning-based gesture-controlled virtual mouse that enables users to control cursor movement and perform actions such as clicking and scrolling using hand gestures. The system uses computer vision and trained ML models to recognize hand landmarks and classify gestures in real time through a webcam, enabling touchless human-computer interaction.
